LEAFLETS DROPPED OVER IRAQ 2002-2003

The Carlyle Group has intimate ties with the current administration, and stands to profit immensely from the war. President Bush's father is a special adviser to the Group, and many men on its board have ties to Donald Rumsfeld and other cabinet members.

The Carlyle Group funds and develops weaponry which our military uses to invade other countries and kill thousands of people in the name of "liberation". They profit from mass destruction, and they use their government connections to secure deadly deals for their private investors.

If this group sounds dangerous to you, send them a copy of this flyer to let them know we're on to them, and contact your elected representatives to demand an accounting for their profits from human tragedy.
